## NEW TWIST TO YOUR PCR REACTIONS?

Prices vat 0%.

### GoTaq® G2 DNA Polymerase

#### - Next-Generation GoTaq® for Robust, Reliable PCR Amplification

- Full-length Taq DNA polymerase that exhibits 5'→3' exonuclease activity
- supplied with 5X Green GoTaq® Reaction Buffer and 5X Colorless GoTaq® Reaction Buffer

M7841 sample size 0€  
M7845 500 U 113 €

M7402 Hot Start sample size 0€  
M7405 Hot Start 500 U 287 €

### GoTaq Long PCR Master Mix

#### - Enhanced processivity and proofreading!

- Excellent also for GC-rich templates

M4020 sample size 0€      M4021 100 rxns 333 €

### RNasin Plus Ribonuclease Inhibitor

#### - Keeps your RNA safe!

- Use in many downstream assays: Inhibits broad spectrum of eukaryotic RNases over wide pH range
- Does not inhibit other RNases and modifying enzymes like reverse transcriptases
- Maintains inhibitory activity over a wide temperature range

sample size 0€

N2511 2500U 159 €      N2515 10.000U 383 €

Jerry is REALLY old... Apparently he once actually poured and run a sequencing gel.

Valid until 31.12.2019
