Cell Strainers

Corning® Cell Strainer is a sterile, easy-to-use device for rapidly isolating primary cells to consistently obtain a uniform single-cell suspension from tissues. Applications include stem cells and primary cells.

Features

- Strong nylon mesh for optimal performance in a variety of applications
- Evenly spaced mesh pores providing consistent and reliable results
- Conveniently accessible in individual packaging
- Extended lip on strainer enables aseptic handling with forceps
- Molded color-coded polypropylene frame with tab enables easy handling and identification
- Fits all major brands of 50mL Conical Tube
- Disposable, easy-to-use, inexpensive, maintains sample integrity
- Sterilized by gamma irradiation, noncytotoxic

Application

- Faster, easier alternative to gauze filtration
- Ideal for preparation of flow cytometry samples, including:
 - Single cell suspensions of blood cells from marrow, pancreas, thymus, tonsil, and lymph nodes
 - Stem cells, tissue-derived cells, and cancer cells
 - Preparation of specimens for primary cell cultures and immunogens
 - Preparation of freezing stocks
 - Filtering agglutinative proteins produced in inactivation serum
